

Career Flight

Career is like an airplane built of paper
No embellishments, no bling, still very dapper

To succeed it needs a correct launch
Hard work and dedication need to be staunch

If skills and excellence form the fuselage
Sound physical and mental health must be the two wings that engage

Obstacles along the way may cause rampage
But support of the loved ones tends to assuage

For a successful flight, ensure both wings are strong
Working towards a healthy body and a happy mind can never be wrong

Gains skills to fly high
Work hard and don't be afraid to touch the sky

But amidst all this, don't be shy
To enjoy the woods as you pass by

To pat your back for every small win
Or for each time you withstand a strong wind

Strive to achieve that pinnacle pie
But don't forget to enjoy the sip of a simple cup of chai
